// WELCOME

TO CLOUDOGU/REVEAL.JS-DOCKER

VERSION: 202512190831-6C3415F

Slide 1

Realised using reveal.js.

Write your slides in GitHub-flavored markdown.

Hotkeys

- `S`: show Speaker Notes
- `?`: show all Hotkeys
- `Esc`: show slide overview (“grid”)
- Cursors: Navigation (on slides “grid”)
- `Space`: next slide
- `,`: toggle presenter Mode

  ➡️ key becomes next slide (helpful for some presenters)
- `Ctrl` + `Shift` + `F`: Search slides
- `Ctrl` + `Alt` + Click: Zoom

Bellow (separated by three empty lines)

Emojis

Font Awesome:

twitter.com/cloudogu

github.com/cloudogu

To the right (separeted by `---`)

Syntax highlighting

```
String hello = "world";
```

Quotes:

> A container image is a lightweight, stand-alone, executable package of a piece of software that includes everything needed to run it: code, runtime, system tools, system libraries, settings.

Column layouts

Column 1

Column 2

Separate files are placed to the right

The order is sorted alphabetically, by default. You can customize this by creating a `slides.html`!

Images

Image via Markdown

The images are floating right and left of this text via css

The image bellow is loaded lazily. It also increases on hover and displays a tooltip

Font

Normal

red

Line Break after two empty blanks

Absolute smaller text

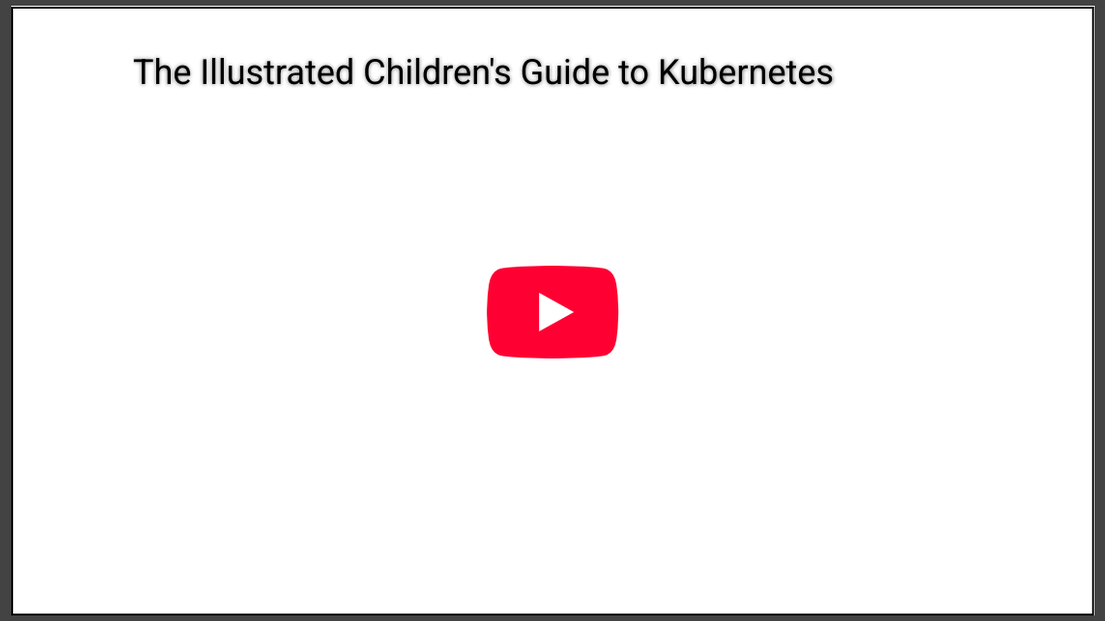
Relative smaller text

Ordered List

1. Ordered
2. List

Link to previous slide (by id)

Video



This text fits the slide

Auto

Auto

Animate

you can transition things like position, font-size, line-height, color, background-color, padding and margin.
See docs.

Full size video background

This slide is not printed

Because of `excludeLocation="print-pdf"` in `index.html`.

See print view

By the way,

- the other way round also works, using `includeLocation`.
- Note that `location` is evaluated as regex!
- See index.html for implementation details.
- To hide parts of a slide in printing use `class="state-background"`.
