 [github.com/cloudogu](https://github.com/cloudogu)

# To the right (separated by - - -)

## Syntax highlighting

```
String hello = "world";
```

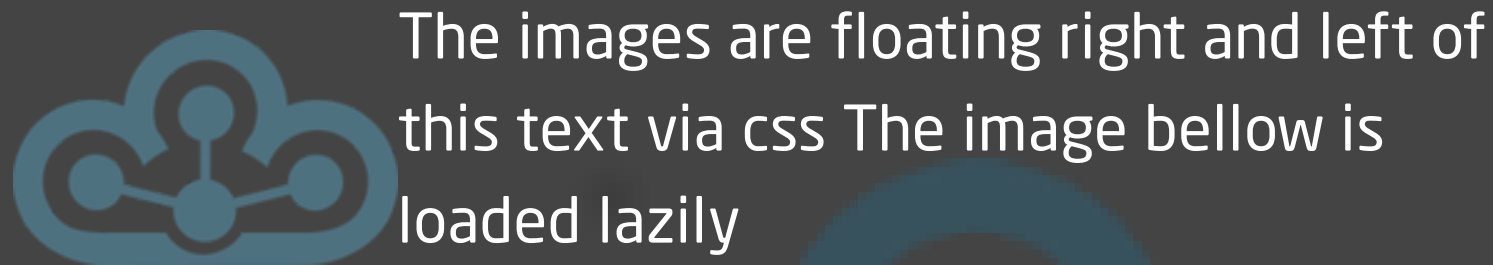

## Quotes:

A container image is a lightweight, stand-alone, executable package of a piece of software that includes everything needed to run it: code, runtime, system tools, system libraries, settings.

## **Separate files are placed to the right**

The order is sorted alphabetically, by default. You can customize this by creating a `slides.html`!

# Images

# Font

- Normal
- red

Line Break after two empty blanks

- Smaller text

# Ordered List

- 1 Ordered
- 2 List

Link to [previous slide](#) (by id)

# Video

This text fits the slide

# Auto

# Auto

# Animate

you can transition things like position, font-size, line-height, color, background-color, padding and margin.

See [docs](#).
