

// WELCOME

TO CLOUDOGU/REVEAL.JS-DOCKER

VERSION: 202512190815-696D39F

Slide 1

Realised using [reveal.js](#).

Write your slides in [GitHub-flavored markdown](#).

Hotkeys

- S: show Speaker Notes
- ?: show all Hotkeys
- Esc: show slide overview ("grid")
- Cursors: Navigation (on slides "grid")
- Space: next slide
- ,: toggle presenter Mode

key becomes next slide (helpful for some presenters)

- Ctrl + Shift + F: Search slides
- Ctrl + Alt + Click: Zoom

Bellow (separated by three empty lines)

Emojis

✗

Font Awesome:

 twitter.com/cloudogu

 github.com/cloudogu

To the right (separated by ---)

Syntax highlighting

```
String hello = "world";
```

Quotes:

A container image is a lightweight, stand-alone, executable package of a piece of software that includes everything needed to run it: code, runtime, system tools, system libraries, settings.

Column layouts

Column 1

Column 2

Separate files are placed to the right

The order is sorted alphabetically, by default. You can customize this by creating a `slides.html`!

Images

Image via Markdown

The images are floating right and left of this text via css

The image bellow is loaded lazily. It also increases on hover and displays a tooltip

Font

Normal

red

Line Break after two empty blanks

Absolute smaller text

Relative smaller text

Ordered List

- Ordered
 - 2 List
- Link to **previous slide** (by id)

Video

The Illustrated Children's Guide to Kubernetes

This text fits the slide

Auto

Auto

Animate

you can transition things like position, font-size, line-height, color, background-color, padding and margin.

See [docs](#).

Full size video background

This slide is not printed

Because of excludeLocation="print-pdf" in index.html.

See [**print view**](#)

By the way,

- the other way round also works, using includeLocation.
- Note that location is evaluated as regex!
- See [**index.html**](#) for implementation details.
- To hide parts of a slide in printing use class="state-background".

Speaker notes
