// WELCOME

TO CLOUDOGU/REVEAL.JS-DOCKER

VERSION: 202405221726-1BC5FAD

Slide 1

Realised using reveal.js.

Write your slides in GitHub-flavored markdown.

Hotkeys

- `S`: show Speaker Notes
- `?`: show all Hotkeys
- `Esc`: show slide overview ("grid")
- Cursors: Navigation (on slides "grid")
- `Space`: next slide
- `,`: toggle presenter Mode (➡ becomes next slide - helpful for some presenters)
- `Ctrl` + `Shift` + `F`: Search slides
- `Ctrl` + `Alt` + Click: Zoom

Bellow (separated by three empty lines)

🐦 twitter.com/cloudogu

github.com/cloudogu

To the right (separeted by `- - -`)

Syntax highlighting

```
String hello = "world";
```

Quotes:

> A container image is a lightweight, stand-alone, executable package of a piece of software that includes everything needed to run it: code, runtime, system tools, system libraries, settings.

Column layouts

Column 1

Column 2

Separate files are placed to the right

The order is sorted alphabetically, by default. You can customize this by creating a `slides.html`!

Images

Image via Markdown

The images are floating right and left of this text via css

The image bellow is loaded lazily. It also increases on hover and displays a tooltip

Font

- Normal
- red

  Line Break after two empty blanks

- Smaller text

Ordered List

1 Ordered
2 List

Link to previous slide (by id)

Video

The Illustrated Children's Guide to Kubernetes

This text fits the slide

Auto

Auto

Animate

you can transition things like position, font-size, line-height, color, background-color, padding and margin.
See docs.

This slide is not printed

Because of `excludeLocation="print-pdf"` in `index.html`.

See print view

By the way,

- the other way round also works, using `includeLocation`.
- Note that `location` is evaluated as regex!
- See index.html for implementation details.
- To hide parts of a slide in printing use `class="state-background"`.
